Earth Wind And Fire, Spend The Night

Dawn Thomas

You're like no one else that I have loved before There's a certain something in my heart For the first time in my life I know for sure You're the love that I've been looking for

A few unsettled differences is where we stand With a little effort we can them out I just want to hold you in my arms again Find it in your heart to let me in

Chorus: I want to spend the night with you Make love like we used to do Oh, I want to feel a fire within I want to fall in love again After we get through I want to spend the night with you

There's a full moon shining in the sky above Let's don't waste this night on sad goodbyes After all it's you that I've been dreaming of Let's give into making up

Chorus (repeat)
