## Earth Wind And Fire, Spirit Of A New World

Maurice White, David Foster, Brian Fairweather & amp; Martin Page

We wake from a dream looking through different eyes Some other space and time Where love survives all the changes Time takes you and I into another life Burn in our hearts of fire A new design, we are changing

Let the spirit of a new world Keep our love alive In the spirit of a new world We're in overdrive

Believe all that we feel Living a future dream Open our eyes to see technology Our direction

Let the spirit of a new world Keep our love alive In the spirit of a new world We're in overdrive

Step into the dance We step into the dance of life Ride the rhythm take a chance We can make the spirit rise

Reach out there's a new world we created Break out, hear your heart shout You can make it
