

# Earth, Wind & Fire, Electric Nation

Maurice White, Brain Fairweather & Martin Page

We're living by computer  
The sound is rushing through ya  
Believe in what your eyes see  
You're in touch with the energy  
The rhythm of the heartbeat  
You can hear it down on Main Street  
The music of a new breed  
It's gonna bring the world to life

Turn it on, come alive  
And let the power flow  
When you turn it on, you're alive  
You're energized inside your mind

Turn on electric nation  
The kids will make the world turn around  
Turn on electric nation  
Everybody's wired for sound

Now we're making progress  
The feeling is the process  
When science meets emotion  
Well then you've found the formula  
Experience the fusion  
Create your own illusion  
Electric celebration  
We're gonna bring the world to life

Turn it on, come alive  
And let the power flow  
When you turn it on, you're alive  
You're energized inside your mind

Make the body generate  
Make it dance  
Switch it on and activate  
Take a chance  
When you feel the chemistry  
Let it go  
Automatic memory  
Take control  
Can you feel what a thrill  
When you dance into another world

Turn it on electric nation  
The kids will make the world  
turn around  
Turn it on electric nation  
Everybody's wired for sound
