Never wanna' live without you  
Cause' my life be incomplete without you so  
I looked into the glass ran ahead of time  
Paid a million to the past now I hope to find  
I'll never have to live without you  
And you'll love me like the day when we first saw the sun  
Shining bright behind the moon

When I'm in your presence  
It fulfills my strong desire  
As long I've been searching  
Now I finally feel the fire

You gave me the love that  
I've been needing for so long  
You built me up when I was weak  
And now I am strong

Nothing in this world  
Creates a loving space  
So nothing in this world can take your place

Chorus

There's no space or time  
Where our love exists  
Eternal love that we have found  
Is planted on a wish  
Every morning when I wake  
I see you lovely face  
And all things that cloud my mind  
Are suddenly erased

Nothing in this world  
Creates a loving space  
So nothing in this world can take your place

Chorus

Oh, what a journey we've traveled  
Far, just to get to this place  
And now, that we're here it's forever and ever -  
Love, just you and I
