

Earthlings?, From Beyond Space Valley

Somewhere out there
Above the stars
All I know,
is you don't rat on Mars.
There's a heavenly body
she never told me a dream

not from this planet
she's out of space
out of this world
she's out of space

When she appeared my doorway was fate
I waited my whole life for this day
She came with a purpose
that was today
when I turned out the light she began to change shape
she comes from a place, from space valley
really ? jetway

not from this planet
out of space
out of this world
she's out of space
she's out of this world
she's out of space
out of space
space
out of space
