## Earthlings?, Reaper (Don't Fear That Child)

(want some, get some) (who's gonna get some?)

a surge of impatience rose up in me making good time toward the scene I'm engaging the flow endlessly

reaper, don't fear this child no more reaper, don't fear this child no more reaper, you fear this child no more

i focused on the scene jungle route to my right between some large trees outcroppings of rock (?) Jungle route through the scene seemed comparatively bare one tree that way very little plants

reaper, don't fear this child reaper, don't fear this child no more reaper, don't fear this child no more

i glanced back to right i was convinced nibbling(?) for food no occupants from the peak i looked horrified

don't fear this child no more reaper, don't fear this child no more reaper, don't fear this child pain don't run away

reaper, don't fear this child no more reaper, don't fear this child no, no more reaper, don't fear this child no more, no more

i stood and gazed at you no more no more
