

# Echo Image, Endless Day (Club Version)

Take me back in time so we can try  
'Cross an ocean-nother mountain say goodbye  
Words what I once said I can't be wrong  
Guess I had my reasons after all

Get by to everyone we're going back in time  
Discover what we all thought possible to find  
Make no mistake this time we'll find another way  
Look back behind and face another endless day

Bending of those words of once belongs  
You should make more sense but I was wrong  
Embracing my events of yesterday  
Guess I should be walking my own way

Get by to everyone we're going back in time  
Discover what we all was possible to find  
Make no mistake this time we'll find another way  
Look back behind and face another endless day

Get by to everyone we're going back in time  
Discover what we all thought possible to find  
Make no mistake this time we'll find another way  
Look back behind and face another endless day
