

Ed Bruce, When You Fall In Love Everything's A Waltz

We don't dance the two-step anymore
All we need's a small part of the floor
The band can go on playin' almost anything it wants
When you fall in love everything's a waltz

Eyes were meant for lookin' into real close
Arms were meant for holdin' what you want the most
Lips were meant to say what bodies feel down in their hearts
When you fall in love everything's a waltz

We don't dance the two-step anymore
All we need's a small part of the floor
The band can go on playin' almost anything it wants
When you fall in love everything's a waltz

We don't hear the music that is being played
But all we need's the music that our two hearts make
Beating soft three-quarter time and we just sing along
When you fall in love everything's a waltz

We don't dance the two-step anymore
All we need's a small part of the floor
The band can go on playin' almost anything it wants
When you fall in love everything's a waltz

Oh the band can go on playin' almost anything it wants
Cause we're in love and everything's a waltz
