

Ed Sheeran, Antisocial (with Travis Scott)

all you cool people you better
leave now coz it's about the happen

Friday night
and I am riding solo
when I touchdown
keep in on the low low

I don't mess with your energy
no photos
so antisocial but I don't care
don't give a damn
I'm gonna smoke here
got a bottle
in my head bring more through
my hat low don't talk to me
I've been down
give me some space
you don't know what's in my brain
music loud easing my pain

don't touch me
don't touch me
don't touch me
I came to vibe
on something
on something
on something
I wanna riot
don't touch me
don't touch me
don't touch me
I came to vibe
I won't let
nothing come in between
me and the night
don't touch me
don't touch me
don't touch me
I came to vibe
on something
on something
on something
I wanna riot
don't touch me
don't touch me
don't touch me
I came to vibe
I won't let
nothing come in between
me and the night

I need I need I need
I need room I need room
when you're standing
way too close you might
catch fumes
might catch fumes
when I zoom when I zoom
pass out wake up by myself right
past noon
right past noon
and I am doomed

(occupied and moving dolo)

hennessy's drowing all of my issues
right before I leave
she gives me more than just a miss you
that thing got more back
just like my engine
I can hit it
see a vision in the boy then we committed

I been lost out inner space
you left me right in my place
I put you down in my name

don't touch me
don't touch me
don't touch me
I came to vibe
on something
on something
on something
I wanna riot
don't touch me
don't touch me
don't touch me
I came to vibe
I won't let
nothing come in between
me and the night
don't touch me
don't touch me
don't touch me
I came to vibe
on something
on something
on something
I wanna riot
don't touch me
don't touch me
don't touch me
I came to vibe
I won't let
nothing come in between
me and the night
