

# Eddy Arnold, Take A Little Time

TAKE A LITTLE TIME  
(John D. Loudermilk)  
'68 Acuff-Rose Music

Take a little time to hold and kiss her  
Or you're gonna find someday you're gonna miss her  
Just a little time is all that love demands and understands  
So take a little time to take her dancing  
Take a little time that's all that she is asking  
Just a little time is all that love demands and understands  
You'll find all that overtime at the office  
And all of those gifts and presents that it buys  
Just cannot beat a couple of the morning coffees  
And a kiss before you're kissed goodbye  
So take a little time and take her dinning  
Or you're gonna wind up boy by finding  
Just a little time is all that love demands and understands  
So take a little time to take her walking  
Just a little kiss and a little bit talking  
Just a little time is all that love demands and understands  
Don't break your back make you a stack of money  
They say the better things in life are free  
So settle down and start hanging round your honey  
Before your honey starts making eyes at me  
Take a little time to say you love her  
Take a little time and you'll discover  
Just a little time is all that love demands and understands  
(And understands)
