

# Edguy, Trace Of Life

Don't know where I come from  
Don't know where to go  
Don't know if I know  
What is good to be known

I wonder if madness  
Is just a child  
Of my urge to know  
The more that I ask  
The more I get down

A million times  
My quest for life is pain  
But still it has not made me going insane

And I long for more  
For a trace of life  
Tearing down all doors  
For a trace of life

You tell me you wonder  
If wondering is heaven or hell  
You say that you've got the view  
On the dark side of life

You can't see the shadows  
The others can see  
But you can see it's well:  
The sun and the day  
The light in the sky

A million times  
Your quest for life has been pain  
But still it is the key to make you sane
