

Edison Glass, Cold Condition

This one thing's for certain
We all need change
We wrap ourselves in blankets
To stay warm

Well, it's still stinging
I can't feel my toes
I'm growing numb, I've come undone
I can't keep out the cold

I don't want to shiver anymore
Or be alone...

We need warmth to come
In our cold condition we need you to visit us
Warmth to come...
A fire from inside to burn out all our lives

Let's sew our hearts together
Love will be our thread
We dance again with no reason and no inhibition
And in this moment we become alive
We dance again with no reason and no inhibition

Warmth to come...
In our cold condition we need you to visit us
Warmth to come...
A fire from inside to burn out all our lives

I'll wait for you here
I want to breathe and let it go
There must be more here than we know
We need warmth to come
In our cold condition we need you to visit

We need warmth to come
In our cold condition we need you to visit us
Warmth to come...
A fire from inside to burn out all our lives
