

Ednaswap, Minor Crap

Don't take a side
What have we done, what have we here?
Don't ask
Don't ignite
You're able but your veins are running fear
My favorite thoughts aren't cut and dried
My favorite things are things I've never tried
I've never tried
I figured it out
I now what you're on about
Thoughts are very small
I'd run if you'd let me crawl
Doo doo doo
I feel safe
The sky is paint
The clouds chip, the water's awful weird
There is no question
No suggestion
Just your voice and its' ringing in my ear
You know it's clear
I don't know how you know
How things have felt this kind
of thing is not material
I figured it out
I know what you're on about
Thoughts very small
I'd run if you'd let me crawl
All this turning around
Leaves everyone all unwound
I figured it out
I know what you're on about
