

Eksperimentoj, Solaris

come undone
it's all over now
above the skies,
I'll find the one
dancing wolves,
howl in the head from morning
silent now,
I'll know it's you

the end of this show
I will not forget
and I let go
for my last soul

I would love all full of stars
bring them down all over around
flashing back,
it starts out in different mornings
instantly,
I'll know it's you

the end of this show
I will not forget
and I let go
for my last soul

I will not belong to the end of it all
I will not be long to the end of it all
