Elan, They Came From The City

They come from the city
Had to get out for a while
Now they're sitting on the fields
Watching the wind blow our worries away

There's a man who came all the way from New Mexico Who forgot just what he came looking for He says if we keep searching well find our soul At the bottom of a tunnel Then we're free to run away

[Chorus]
Come with me
Come with me
Come with me
Come with me
It's only us out here

And at the end of the day well still be awake
And well dance around the fire
And tell stories of yesterday
Then well walk away into the endless ocean of insanity
And pretend to be ok
It's not me away

[Chorus]
Come with me
Come with me
Come with me
Come with me
It's only us out here
[x2]
