

# Electrasy, Million Of You

I never want to die  
And leave you alone in life without me  
Because I need you  
And I never really tried  
To open up my mind before this  
Because I need you  
Look into your eyes  
It made me realize the reasons  
I found a million in you

Look at the stars and see  
You're looking back at me  
No wonder we have it all  
The shadows have disappeared  
As you make it all so clear  
There's nothing to fear  
Won't run and hide  
I'll be right by your side  
My reasons for living

I know I've found  
A million in you now  
A million in you now  
A million in you  
I'd rather have  
A million of you now

Is it taking you over?  
Cos I've loved you in this life  
Just like I've loved you before  
You've taken me over  
And for whatever the reason  
I know I've found  
A million in you now

A million of you now  
A million of you now  
A million of you

Cos I've loved you in this life  
Just like I've loved you before  
You've taken me over
