

# Electric 6, Synthesizer

You can shake it all around  
You can go up and down  
You can lose what you found  
But you can't ignore my techno

You can go west to east  
Confess your sins to a priest  
You can slay the wicked beast  
But you can't ignore my techno

You can go to the doctor  
You can cough in his face  
Infect the whole human race  
But you can't ignore my techno

You can laugh you can cry  
You can live you can die  
Spend you days asking why  
But you can't ignore my techno

You can trip on my synthesizer  
Electronic world for every boy and every girl  
You can trip on my synthesizer  
In the end technology of the world will set us free

Be all that you can be  
Just as long as you are free  
You were blind but now you see  
That which is my techno

You can trip on my synthesizer  
Electronic world for every boy and every girl  
You can trip on my synthesizer  
In the end technology of the world will set us free

You can trip on my  
You can trip on my  
You can trip on my  
You can trip  
You can trip  
You can trip on my synthesizer  
You can trip on my synthesizer

Let's go.
