Electric 6, Synthesizer

You can shake it all around You can go up and down You can lose what you found But you can't ignore my techno

You can go west to east Confess your sins to a priest You can slay the wicked beast But you can't ignore my techno

You can go to the doctor You can cough in his face Infect the whole human race But you can't ignore my techno

You can laugh you can cry You can live you can die Spend you days asking why But you can't ignore my techno

You can trip on my synthesizer Electronic world for every boy and every girl You can trip on my synthesizer In the end technology of the world will set us free

Be all that you can be Just as long are you are free You were blind but now you see That which is my techno

You can trip on my synthesizer Electronic world for every boy and every girl You can trip on my synthesizer In the end technology of the world will set us free

You can trip on my
You can trip on my
You can trip on my
You can trip
You can trip
You can trip on my synthesizer
You can trip on my synthesizer

Let's go.
