

# Electric Six, Future Is In The Future

If money talks, then I'm a mime  
If time is money, then I'm out of time  
And I was once worth a million quid  
Have a seat, I'll tell ya what I did

Can't sit down, 'cause I'm a dancer  
And you know that I'm the answer  
Die slow, die, fast now  
'Cause it's never going to last, now

We'll karaoke all night long  
We'll Macarena 'till the break of dawn  
We'll drive around until the morning light  
All night, all night, all night, all night

Baby, you got to signal before you turn  
I think you're heading for the disco burn  
'Cause the future is in the future  
And the past is a big brick wall  
You know I need to make you understand, now  
I'm a man, not a disco ball  
Can't sit down cause I'm a dancer  
And you know that I'm the answer  
Die slow, die fast, now  
'Cause it's never going to last, now

We'll karaoke all night long  
We'll Macarena 'till the break of dawn  
We'll drive around until the morning light  
All night, all night, all night, all night

We'll karaoke all night long  
We'll Macarena 'till the break of dawn  
We'll drive around until the morning light  
All night, all night, all night, all night  
All night, all night, all night, all night  
All night, all night, all night, all night  
All night, all night, all night, all night  
All night, all night, all night, all night
