

Electrosy, Chemical Angel

Who's gonna be my modern girl, modern girl, modern girl
And take my body to another world
Cos there's something inside me that says you will
Who's gonna be my razor queen, razor queen, razor queen
And take my body like a line of speed
Cos there's something inside me that's what you need

I'm so glad I'm living with a modern girl, she gets me high
We're so glad we're living in a different world to what you are

Who's gonna be my chemical angel, chemical angel, chemical angel
And take my body to a level of danger
Cos there's something inside of me that's getting stranger

Who's gonna give me what I want
Who's gonna give me what I want
Who's gonna give me what I want

I'm so glad I'm living with a modern girl, she gets me high
We're so glad we're living in a different world to what you are
