

# Element Eighty, Echo Song

## Echo Song

You said that we would always be friends  
You said our love would never end  
But all you gave to me were scars on my heart  
All you did to me was tear my world apart  
You left these scars on my heart

You took my love and made it bend  
And you knew my money was for you to spend  
You stabbed my heart and tore my world apart  
and all you left me with were scars on my heart

Scars on my heart  
These scars on my heart  
Scars on my heart  
Scars on my heart

You took my love way past the line  
You took this broken heart and you made it mine  
But I don't need your sympathy  
No I don't need one damn thing

You left these scars on my heart  
Scars on my heart  
Scars on my heart  
Scars on my heart

And now I'm scarred  
And now I'm scarred forever

You said that we would always be friends  
You said our love would never end  
All you gave to me were scars on my heart  
And all you did to me was tear my world apart

Scars on my heart  
These scars on my heart  
Scars on my heart  
Scars on my heart

Don't make me

And now I'm scarred  
And now I'm scarred  
And now I'm scarred forever

Scarred
