

Element Eighty, Yankee Cake

I can feel you, sick and demented
The knife is twisting in my back
And you call yourself a fucking friend

Now this time, i'm beside you
I'm alive, and breathing right inside of you
I'm insane, I loathe you
I'm alone and better off without you

Take me away, life is such a shame
The time bomb is ticking in my mind
And you call yourself a fucking friend

Now this time, I'm beside you
I'm alive, and breathing right inside of you
I'm insane, I loathe you
I'm alone and better off without you

Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away

Well I, I can't taste everything I hate about you
The scars are tearing up my face
And you call yourself a fucking friend

Now this time, I'm beside you
I'm alive, and breathing right inside of you
I'm insane, I loathe you
I'm alone and better off without you

Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away
Hey motherfucker don't you come my way
Hey motherfucker better stay away

Take a look from the inside
Take a look from the inside
Take a look from the inside
Take a look from the inside
Take a look from the inside
Take a look from the inside
Take a look from the inside
Take a look from the inside
