

Eleventeen, Let's Go for a Ride

Let's go for a ride
Roll the windows down turn the music up on the stereo
I wanna hear my songs from miles away on the radio
It's just you and me tonight with nothing in our sights
It's just you and me tonight
and nothing can take this away from me with you right by my side
I wanna hear my song on the radio
It makes everything alright
wait outside your door with your bags all packed
I'll wait outside your door
Pedal to the floor
We'll drive into the night and keep nothing in our sights
We'll drive into the night
Roll the windows down turn the stereo up
I wanna feel the wind rush through my hair
When you're not with me I find myself singing your harmony
