

# Eli Young Band, Everything Is You

Everything Is You

Eternal flame came on the radio  
And I remember how you loved it so  
Memories sneak on me, wherever I go

A car like you used to drive  
Pulled beside me today at the light  
Chances break and cry wherever I go

And you want me to be strong, any less just shows I'm weak  
How'd ya turn so cold, where's the girl I used to know

Chorus:  
And it's love and hate and all these emotions  
I never thought that you'd be going  
I'm just going through the motions  
Where everything is you, everything is you

An inside joke comes to mind  
We'd wear them out all the time  
Memories sneak up on me wherever I go

And it seems you've disappeared, though you're not that far away  
Please tell me it's not true, I didn't mean that much to you

And it's love and hate and all these emotions  
I never thought that you'd be going  
I'm just going through the motions  
Where everything is you, everything is you

What did I do wrong, nothing I treated you like an angel  
What did I do wrong, nothing I treated you like an angel  
What did I do wrong, nothing I treated you like an angel  
I treated you like an angel

And it's love and hate and all these emotions  
I never thought that you'd be going  
I'm just going through the motions  
Where everything is you, everything is you
