ELO, Four Little Diamonds

"Is this on? OK, after four! Four!"

I used to think she was the greatest thing I really can't give her a diamond ring She said she'd rather die than ever leave me Well, I never saw her face since then And if the law don't get her, then I will Four little diamonds.

She must be somewhere on the open road She always said she was the lonely one She gets you down with her tales of woe She took me for everything And if the law don't get her, then I will Four little diamonds.

Ooh, ooh Four little diamonds.

I looked around, I climbed up high into the dawn But she was gone into the night I thought about the things she said And all the things we'd done But where could she run There's just no answer to give.

I keep a-wonderin' 'bout her day and night She probably thinks I was a fool, she's right She don't know it But I'm gonna keep on searchin for that woman I'm gonna search everywhere And if the law don't get her, then I will Four little diamonds.

Ooh, ooh Four little diamonds.

I looked around, I climbed up high into the dawn But she was gone into the night I thought about the things she said And all the things we'd done But she ran away There's just to answer to give.

I still hear callin' out to me I still listen for her endlessly But it never even crossed my mind she was a cheater I gotta find out where she hides 'Cause if the law don't get her, then I will Four little diamonds.

Said if the law don't get her, then I will Four little diamonds.

Said if the law don't get her, then I will Four little diamonds Four little diamonds.
