

# ELO, Starlight

(Starlight callin',  
Callin', callin')

Starlight, I hear you  
Callin' out to me  
(I hear you callin', callin', callin', callin').

Sweet love, rollin'  
Across my mind again  
(You roll across my mind).  
I want you, yes, I do,  
I need you, yes, I do.  
And then you run.

You gotta stop  
Foolin' around,  
Keep your feet  
On the ground, little girl.  
And starlight will shine  
All around, little girl.

(Starlight callin')

Starlight, your eyes  
Are lookin' out so far away  
(I hear you callin', callin', callin', callin').

Constellation in the sky  
Is smiling down on me,  
I wonder, wonder why  
(I wonder, wonder why).  
I can feel you're so real,  
I can see you're so near,  
And then you run.

You gotta stop  
Foolin' around,  
Keep your feet  
On the ground, little girl.  
And starlight will shine  
All around, little girl.

You had me all  
Summer long, little girl  
(It's no good at all).

Moon glow, come light  
The way up to my window  
(I hear you callin', callin', callin', callin').

As you roll across the night,  
Don't tell nobody  
That I told you so.  
I need you, yes, I do,  
I need you, yes, I do,  
And then you run.

You gotta stop  
Foolin' around,  
Keep your feet  
On the ground, little girl.  
And starlight will shine  
All around, little girl.

You had me all  
Summer long, little girl  
(It's no good at all).

Starlight, your eyes  
Are lookin' down on me  
So far away.  
Starlight, your eyes  
Are lookin' down on me  
So far away.  
Starlight, your eyes  
Are lookin' down on me  
So far away.  
Starlight, your eyes  
Are lookin' down on me  
So far away  
Starlight, your eyes  
Are lookin' down on me  
So far away...
