Elvis Presley, I'll Never Know

How many stars are in the sky, I'll never know What fire lights a firefly, I'll never know

What happens to this heart of mine each time you hold my hand Sometimes the things we love the most We never understand I never thought these eyes would see an angel's glow What miracle brought you to me, I'll never know

What happens to this heart of mine each time you hold my hand Sometimes the things we love the most We never understand I never thought these eyes would see an angel's glow What miracle brought you to me, I'll never know What miracle brought you to me, I'll never know
