EMF, It's You (That Leaves Me Dry)

I feel like a world gone crazed At the thought of you Your hot ways still chill I'm closing in on you Temptation never leaves me But leaves me every once and a while And it's you, it's you That leaves me dry every time And I only need to take it so far Before all these tears leave their smears And the thoughts of you disappear It's you, it's you That leaves me dry every time Torch my soul and leave the core You take it all, you take it all And you can take this and more Just before you shut the door All these tears leave their smears And the thoughts of you disappear (chorus) We gotta go down south Just about as far as you gotta go Across the border You know the way it goes (repeat chorus)
