

Empires, Warning Mark

You've gotten hideous
I'd like to push you hard to an orange iron
Giving you a warning mark
So you can be in and out with everyone you meet
No one will keep you around
You will hear me laughing in the back of your head
You'll never get so deep
You'll never hold it down

They'll always see my warning
They'll call you beautiful
And in the morning
You'll be stranded in love
You'll never live it down
It goes around, goes around
Goes around, goes around

There's nowhere out for you
No one to make confused
Will you come after me?
Won't you come after me?

And they'll see my warning
They'll call you beautiful
And in the morning
You'll be stranded in love
You'll never live it down
It goes around, goes around
Goes around, goes around

All we have is nothing, baby
Nothing gives us everything
All we have is nothing, baby
Nothing gives us everything
All we have is nothing, baby
Everything
Everything

And they'll see my warning
They'll call you beautiful
And in the morning
You'll be stranded in love
You'll never live it down
It goes around, goes around
Goes around, goes around
