

En Vogue, Work It Out

Work It Out

You know I got a thing for you
I know you got a thing for me too
So tell me baby what's it gonna be, ooh?
Here we are alone again
Just like before we had a chance
For romance baby
And now it's slippin' out our hands baby
Oh well
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this here's not enough
We need changed
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this s*** is gettin' old
The love is gone
Who's gonna be the first to say goodbye
How do we choose?
When we have so much to lose
Stop it, stop pretending nothing is wrong
Just admit this is it so we can move on
Cause I can't go on living my life this way
Day after day just sitting here
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this here's not enough
We need changed
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this s*** is gettin' old
We could be livin' like my dream fantasies
Where you hold me in your arms and kiss me so softly
My thoughts would be always of you
And the kind and gentle things you do, yeah
But reality pulls me out of my mind
And instead of that I'm still sittin' here
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this here's not enough
We need changed
Sittin' here ain't got much to talk about
What we gonna do to work it out?
Cause this s*** is gettin' old
(conversation.....)
