

Endo, For You

I know
You need me
And I will surrender
For you somehow
Foresake my soul

What's over is done
What's over is true
To be like you
To be like me
What's over is done
What's over is true
To be like you
To be like me

I breathe
You in me
Now and forever
For you somewhere
Forsake my soul

What's over is done
What's over is true
To be like you
To be like me
What's over is done
What's over is true
To be like you
To be like me

My love
For you
Leans on leans on me

What's over is done
What's over is true
To be like you
To be like me
What's over is done
What's over is true
To be like you
To be like me

For you
For you
For you
For you
For you
For you
