Endo, For You

I know You need me And I will surrender For you somehow Foresake my soul

What's over is done
What's over is true
To be like you
To be like me
What's over is done
What's over is true
To be like you
To be like me

I breathe You in me Now and forever For you somewhere Forsake my soul

What's over is done What's over is true To be like you To be like me What's over is done What's over is true To be like you To be like me

My love For you Leans on leans on me

What's over is done
What's over is true
To be like you
To be like me
What's over is done
What's over is true
To be like you
To be like me

For you For you For you For you For you
