

Endway, And We Live

And I choose faith to save my life,
but I would never ever pay for it
you take away my strength,
take everything from me
and it feels like my fault that
no one ever, ever gets to see
that we'll find another way
all we need is something to hold on

Take my hand and sing with me now
Take my hand and sing
And we live, and we live and we live
To find another way
So come along with me do the right thing

and I found this, I found this place to stay and
there's room for everyone I know,
so come along with me
we could use your help living the endway

I could sing forever standing by myself,
I need your help
to take them down, take them down
