

Endway, This Town Forever

And I wont stand around forever
We all say the same things
Were you the best that I'd ever had
I'd ever had
Take back all the stupid things that you said, that you said
Send a post card to all my family friends
Take the wind away

It should've been easier this way
well things change
were not the same anymore
Ive come this far to say
i just dont understand

Take back all the stupid things that you said, that you said
Send a post card to all my family friends
Take the wind away

We wont stand around in this town forever
We wont stand around in this town forever
And theres no way Ill be coming back
To spend my time on you
Im tired of waking up to you, Im tired off all the things we do

And thats what they all say
And thats just what you say
and thats what they say when you were with us now - with us now
