

# Endway, This Town Forever

And I wont stand around forever  
We all say the same things  
Were you the best that I'd ever had  
I'd ever had  
Take back all the stupid things that you said, that you said  
Send a post card to all my family friends  
Take the wind away

It should've been easier this way  
well things change  
were not the same anymore  
Ive come this far to say  
i just dont understand

Take back all the stupid things that you said, that you said  
Send a post card to all my family friends  
Take the wind away

We wont stand around in this town forever  
We wont stand around in this town forever  
And theres no way Ill be coming back  
To spend my time on you  
Im tired of waking up to you, Im tired off all the things we do

And thats what they all say  
And thats just what you say  
and thats what they say when you were with us now - with us now
