

Engerica, Groaner

I'm getting tired of all these things
Get in my way but I care
I look around for a brand new sound
To break it round
But I don't believe in it one way

You're making the time, appropriate signs
You make me believe where you've been
I don't see nothing but you
She makes me groan
I'll be your best friend and sympathise
Understand everything

I don't mind this, you want to piece
These things together
So I, I talk to you and make it better
And in the end I walk away
From this disease and you had better
Find out why

Can't be the only one
I'll die the only one
Hope in the empty sky
Brave and broken
And if I die today
Through lack of holiday
And what's a holiday
If you're not there
So why'd I care?

You're making the time, appropriate signs
You make me believe where you've been
I don't see nothing but you
And then she makes me groan
I'll be your best friend and kiss your thighs
Understand everything

I don't mind picking up pieces
Of what you break but
I don't get these things you'll never
Understanding why
You're always inbetween

And in the end I walk away
From this disease and you had better
Find out why

Around around around
Around around around
Around around around

You're making the time, appropriate signs
You make me believe where you've been
I don't see nothing but you
And then she makes me groan
I'll be your best friend and kiss your thighs
Understand everything

You're making the time, appropriate times
You're making the time, appropriate times
You make it up, you make it up
You make it up, you make it up yeah

Make it up...
