

Engine, Alone

I can see the star that you
Hang above your halo
I can feel your cold steel stare
I can feel your heart too
I feel you
With your heart in hand
And your nervous sigh
Are you nervous now
I am alone in this world
And you're never going to take it away
As I lay in darkness
I feel the cold around me
Feel the frozen arms of you
And the solace you bring
I feel you
With your heart in hand
And your nervous high
Are you nervous now
I am alone in this world
And you're never going to take it away
I won't follow you down
And all you say is
Hey it's okay
I've felt your heartache
I am alone in this world
