

Engine, I Don't Need

Supercharged you're superheated
Everything your life has needed
You make your own decision
Carving out your soul no savior
And the lovely way you cum
And call it love
I don't need to know
I don't need
Suicide you're superseded
Farther than you knew you could be
Everything you never needed
Makes my soul bleed out
And the lovely way you cum
And call it love
I don't need to know
I don't need
You, you're never me
You're always the same
You're never wrong
