

# Engine, Losing Ground

Shoot me up, Shoot me down  
It's a false society  
Struggle hard, struggle free  
Turn your back on everything  
Something I could never see  
Someone I could never be  
So you take the best of everything and throw it all away

Set us up, set us free  
Then take everything away  
Social set, simple gain  
The path you follow is the same  
Something I could never see  
Someone I could never be  
And you take the best of everything and throw it all away  
(chorus)

And I'm losing ground in this human race  
And we're losing ground in this human race

Like staring at a blank screen  
You're already dead

Tear it up, Tear it down  
You're a tragedy to me  
What you play, what you fake  
It's not reality to me  
Something I could never see  
Someone I could never be  
And you take the best of everything and throw it all away
