Epica, Natural Corruption

Natural corruption

Another day passed by in ruined paradise Another night will pass until we're sheltered We're aiming for a life that won't be compromised And when we say goodbye it's devastating

Now that we have finally realized Realized, petrified That profit's made from innocent demise Profit's made from tragic demise

Another day goes by where money won't suffice A massive gift was meant as contribution Our conscience comes to aid that ends up in wrong hands And once the truth's revealed, intent is fading

Now that we have come to realize Realized, sanctified Our hearts subdued by all those thousand cries Hearts subdued by all those fierce cries

In moments of deadly gloom Young lives ended way too soon The facts that are all untrue Spread lies that wew not thought through

Fight off the catastrophes
Find true inned sanctity
In modern society
Welfare is stained, time to come clean again

Feast on sheer agone Lean on generosity Pay in full, it all will vanish without care Grant us higher proceeds

We'll ease your mind, guaranteed We should all be reaching out to the despaired

Natural corruption Charity

Can you believe it How nature's left its trace Could we foresee it What skies erased

We all are trying We all are dying in nature's arms...

In moment of deadly gloom Youg lives ended way too soon The facts that are all untrue Spread lies that were not thought through

Fight off the catastrophes
Find true inner sanctity
In modern society
Nothing to hide, lives to obtain
Welfare is stained, time to come clean again
