

Erasure, Love Is Colder Than Death

Love is colder than death they say
So warm your heart to the bone
Hold me closer, don't dare to speak
Cause soon my love, I'll be gone

Cherish the moment with me
Love for all, love for all
All eternity

Go and dance with the moon tonight
The starlight to serenade you

Venus, the goddess of love
Love for all, love for all
All eternity

Love for all, love for all
All eternity
