

# Eric Carmen, She Remembered

(Eric Carmen)

I went back to my class reunion  
I was wondering how my friends have changed  
I was thinking about a certain girl  
I was hoping to find there  
I walked in and she caught my eye  
Though she was standing with another guy  
All the years seemed to fade away  
Could it be she still remembered

She remembered  
It was so long ago  
Could we ever feel that way again  
She remembered  
Making love 'neath the stars  
Oh, the world was so much younger then  
When we kissed and my heart stood still  
I said I loved her and I always will  
'Cause dreams are forever  
And some things you never forget

She introduced me to the guy she was with  
Then I asked her if she'd like to dance  
We hit the floor as the band began  
our favorite old slow song  
I pulled her close and to my surprise  
I heard her whisper as she closed her eyes,  
"God it's just like it used to be  
I wasn't sure if you'd remember"

I remember  
It was so long ago  
Could we ever feel that way again  
I remember  
Making love 'neath the stars  
Oh the world was so much younger then  
When we kissed and my heart stood still  
I said I loved her and I always will  
'Cause dreams are forever  
And some things you never forget

Oh darlin', please don't try and understand it  
Let's be fools for one moment in time  
After all, this is not as if we planned it  
Just hold me close and remember  
when you used to be mine

I remember when  
She remembered  
It was so long ago  
Could we ever feel that way again  
She remembered  
Making love 'neath the stars  
Oh the world was so much younger then  
When we kissed and my heart stood still  
I said I loved her and I always will  
'Cause dreams are forever  
And some things you never forget

Well, dreams are forever  
And some things you never forget
