

Erik Faber, Strange

She gave me all but days
I knew that she'd be gone
Now I travel the same road every night
Knowing she's the one

Now I can't wait a day
For her to get back home
I travel the same road every night
I hope it won't be long

Till we all meet down at the end
And nothings wrong and nothings changed
I long for that other place
Cause where I'm at it's so, so strange

Now I'm out of ways
To tell her why she's wrong
Don't worry she whispers every night
I know where I belong

Till we all meet down at the end
And nothings wrong and nothings changed
I long for that other place
Cause where I'm at it's so, so strange
I hope, I hope it won't be long
Won't be long

Till we all meet down at the end
And nothings wrong and nothings changed
I long for the other place
Cause where I'm at it's so, so strange
I hope, I hope it won't be long
I long for the other place
Where I'm at it's so,so strange
