

Ernest Tubb, Big City

I'm walking your streets again big city searching every face that I see
Looking for my darling big city the one that you took away from me

You lured her with your night life big city to take her from me you know it was wrong
I'm searching night and day for her big city oh without her love I just can't go on
[guitar]

You took my love away from me big city stole her out of my two loving arms
You know I'm gonna hate you big city if you brought my baby any harm
So I'm walking your streets...
The one that you took away from me
