

Ernest Tubb, You Won't Ever Forget Me

You tell me tonight that we're parted you tell me that we are through
You're sorry you say that it's over but that you have found somebody new
But before you leave me my darling before you go far away
Please listen to me for I love you dear and I have a few words to say
You won't ever forget me no matter how hard you'd try
And when it's too late my darling you will wish you had not said goodbye
[guitar]

So be sure to your heart you're not lying be sure you don't still love me yet
It's easy to find a new love but an old love it's hard to forget
So dear take this thought along with you wherever you happen to be
Your lips may be true to another but your heart will be crying for me
Cause you won't ever forget me...
