

Esmee Denters, Sad Symphony

Did anybody hear that
Theres a string that just broken my heart
I can feel it
and the sound of it tears me apart
Play it again
Cause I don't recognize this song anymore
Can you make it sound like it did before?
Its the same old melody
And I cant stand what you do to me
Why you keep strumbling on the strings of my heart
It beats like a
But you stole that away from me
I shouldve known it right from the start
Oh baby
All I know is I don't wanna hurt no more
All I know is this song needs a different chorus
Cause theres so many times that I feel like weve been hit before
I stay crying when you walk out the door
I hear a sad, sad symphony
A sad, sad symphony
Its like a sad, sad symphony
I hear a sad, sad symphony
Somebody save me
Cause im surrounded by all of these sounds
Its driving me crazy
Cause you're playing me way too loud
All I hear is noise
Now I cant hear my own voice
Now I, I didn't wanna tell you so
But you're bringing me down
Bringing me down
Its the same old melody
And I cant stand what you do to me
Why you keep strumbling on the strings of my heart
It beats like a
But you stole that away from me
I should've known it right from the start
Oh baby
All I know is I don't wanna hurt no more
All I know is this song needs a different chorus
Cause theres so many times that I feel like weve been hit before
I stay crying when you walk out the door
I hear a sad, sad symphony
A sad, sad symphony
Its like a sad, sad symphony
I hear a sad, sad symphony
The song in my head's playing everywhere I go
It's taking the beat from my heart
I wanna hear the outcome
But I guess we're stuck
Cause I already know this part
And it seems we just cant get past the start
All I know is I don't wanna hurt no more
All I know is this song needs a different chorus
Cause theres so many times that I feel like weve been hit before
I stay crying when you walk out the door
I hear a sad, sad symphony
A sad, sad symphony
Its like a sad, sad symphony
I hear a sad, sad symphony
