

Espen Lind, All I Want Is An Angel

I saw her first
She came around
The day my angel came to town
This is just a love song, yeah
Well, her shine was white, she rode the light
She let her wings go where they might
She looked to be a wild one, yeah
When she just got in my car and said
Boy, drive me to the end of the World
All I want is an angel
And I know she will stay on my mind all the way
All I want is an angel
One like you
Like you, yeah
We drove all day we didn't stop
Along the way until the top
Of the cliff by the sea, yeah
So, she played her tapes of afghan wings
'Cos that's the rock'n' roll she digs, well
It was all a fantasy
All I what is an angel
And I know she will stay on my mind all the way
All I what is an angel
one like you
Like you
And when the night tumbled down on us
Her name was tattooed over my heart
All I want is an angel
Then I know she will stay on my mind all the way
All I want is an angel
One like you
Like you
The moon was high and so was I
'Cos I was drowning in her eyes
And while the waves crashed to the shore
I would politely ask for more
I didn't even know her name
But frankly that was all the same
Because I just could not believe
That this was happening to me
All I want is an angel
I can hold on a leash
Who will do what I please
All I want is an angel
Just for me
Just for me
All I want is an angel
Then I know she will stay on my mind all the way
All I want is an angel
One like you
Like you
