

Etherdust, Hey God

Hey god I'm feeling like I'm falling apart
Yet I have started to believe in myself more this time around
Hey god are you trying there just like me or
Do you just look good enough trying to mock me down

Hey fuck do you consider this to be my gain
Is this okay if I try and fuck everything the same
Bad luck you counted on me and this is all you gain
I know fight back do nothing and its all the same

Hey god feeling like myself again
For once come around and start to feel my pain
Do you think you could make me hurt anymore
Do you think i could give a fuck anymore

Hey fuck do you consider this to be my gain
Is this okay if i try and fuck everything the same
Bad luck you counted on me and this is all you gain
I know fight back do nothing and its all the same

I feel i am lonely deep inside like you
I think i am hurting deep inside like you
