

Eugenio Finardi, Long Way Home

When youre cold Ill keep you warm
When in doubt Ill make you strong
Give you shelter through the raging winter storm
Help you right what is wrong

You know I wont falter
I wont stumble, I wont fall
Cause you know my heart is constant
Steady as that Northern Star

Its a long way home
And its a long way home

Lord knows I dont want to control you
In fact I dont want anything at all
You know I dont want to own you
I dont want to use you
And if you need me all you got to do is call

And its a long way home
And its a long way home
And its a long time before the dawn
And its a long way home
