Europe, Brave And Beautiful Soul

I see you all cynical It's the ammunition that you need Here's another song about empathy Please yourself think what you will

In her light that shines I fall apart Her life is blessed and I don't understand The brave and beautiful soul Brave and beautiful soul

Here's to you all sensible Never taken time to stand for something Hey, the future always come round here to soon I just cant leave here doing nothing

In her light that shines I fall apart In her darkness, how she wins my heart The brave and beautiful soul Brave and beautiful soul

An emotional response Sometimes better than an intellectual one

In her light that shines I fall apart Her life is blessed and I dont understand The brave and beautiful soul Brave and beautiful soul
